

## **OREGON R.O.M.P. 2025**

### **PROPOSED ITENERARY**

#### **WEDNESDAY, July 9**

Receive the tent & wall for set up.

The tent needs to be set up before the wall can be moved in. We will need people to set this up that have experience. We are requesting assistance from the local National Guard. As of today, no response other than they do not have access to the size of tent that we need. Once the tent is up and secured the wall can be moved in and set up. This all generally takes a few hours.
